CAREER OBJECTIVE

Software QA Engineer with 3+ years of experience in manual and automation testing across Healthcare ERP, Web Portal, CRM, and E-commerce applications. Skilled in test case design, functional, regression, integration, and API testing using Postman, with defect tracking in JIRA and test automation using Playwright and Selenium WebDriver. Experienced in supporting the complete QA lifecycle, from requirement analysis and test execution to defect reporting, retesting, and release support. Committed to improving software quality, test coverage, and reliable Agile project delivery.

PROFESSIONAL EXPERIENCE

Software QA Engineer, E-Medical Software Ltd 09/2024 – Present

- Designed and executed test cases for Healthcare ERP modules (Registration, Hospital, Pharmacy, OPD, EMR, Diagnostic, MIS) following SDLC and STLC processes.
- Performed functional, regression, smoke, sanity, API and performance testing.
- Conducting load testing for the Healthcare ERP System using JMeter.
- Conducted API testing using Postman for SMS gateway integration across modules such as Doctor Appointment, Patient Admission, OT Schedule and Discharge.
- Collaborating with developers, business analysts and stakeholders to ensure defect resolution within release timelines.
- Supported 10+ product releases, ensuring timely QA sign-off, smooth UAT testing and on-time production deployments.

Projects: Healthcare ERP – Popular Medical College Hospital, Kidney Foundation Hospital Sylhet, Medinova Medical Services Ltd and Healthcare Web Portal, Avante Aesthetics, Healthcare Web Portal & CRM (Customer Relationship Management), Fouad Al-Khateeb Hospital and Healthcare Web Portal, Akij Mediplex Limited and Healthcare Web Portal, Akij Insaf Diagnostic and Consultation Center and Akij Insaf App

Junior SQA Engineer, Battery Low Interactive Ltd 07/2023 – 08/2024

- Designed, developed and executed manual test cases based on business requirements, user stories and acceptance criteria to ensure complete test coverage.
- Performed functional, regression, integration, smoke, sanity, UI/UX and cross-browser testing to ensure product quality across web and mobile platforms.
- Performed web and mobile application testing (Android & iOS) for usability, responsiveness and functionality across multiple devices.
- Executed performance and load testing using JMeter, ensuring platform stability and scalability during high-traffic events.
- Reported and tracked critical defects using JIRA, collaborating with developers and product managers for timely fixes.
- Supported end-to-end testing, UAT and QA sign-off for smooth production deployments.

TECHNICAL SKILLS

Software Testing	: Manual Testing, Requirement Analysis, Test Planning, Test Case Design, Test Reports, Test Environment Setup, Test Execution, Smoke, Sanity, UAT, Regression Testing and Bug Reporting
Automation Testing	: Playwright, Selenium WebDriver
API Testing	: Postman
Performance Testing	: Apache JMeter
Security Testing	: Penetration testing with Burp Suite
Compatibility Testing	: Cross-browser and cross-device testing using BrowserStack
Agile	: Working knowledge of Agile (Scrum)
SDLC & STLC	: Strong understanding of SDLC and STLC, testing stages, Defect Lifecycle, Test Management, Risk Analysis
Database Testing	: MySQL and MSSQL for data validation and backend testing
Test Management	: JIRA, GitHub
Programming	: TypeScript, Java (for automation frameworks)
IDE / Version Control	: Visual Studio, Eclipse / Git, GitHub
Soft Skills	: Team Collaboration, Strong Communication, Problem-Solving, Critical Thinking

AUTOMATION PROJECTS

Medinova Medical Services Ltd

Automated critical healthcare workflows using Playwright with TypeScript including Registration, login, Diagnostic, Pharmacy, OPD, patient management and billing modules. Developed reusable test scripts using Page Object Model (POM) and validated functional and regression scenarios.

GitHub Repository: [View project on GitHub](#)

Popular Medical College Hospital

Worked on Hospital, OPD, and Pharmacy workflows using Playwright with TypeScript. Developed reusable test scripts using the Page Object Model (POM) pattern and executed Smoke and Regression testing to validate critical functionalities and ensure application stability.

GitHub Repository: [View project on GitHub](#)

E-commerce Website

Tested key E-commerce workflows using Playwright with TypeScript, including user registration, login, product browsing, cart management, and checkout. Developed reusable automation scripts using POM and performed Smoke and Regression Testing.
